

IT'S THE LAW !!!

(N.F.P.A.) CODE 25: (Section 4-3.2 through Section 4-5),

ANNUAL INSPECTION AND TESTING OF ALL FIRE HYDRANTS LOCATED ON YOUR PROPERTY.

Fire departments are not responsible for testing or maintaining your fire hydrants.

(Fire departments testing hydrants in your area are primarily there for determining code violations only)

You are required by law to comply with the National Fire Protection Association (N.F.P.A.) CODE 25: (Section 4-3.2 through Section 4-5), which mandates the annual inspection and flow testing of each fire hydrant located on your property.

Fire hydrants are required to be tested by the property owner, just as fire sprinkler and extinguisher systems. If you do not currently have an annual hydrant testing program, you are subjecting your organization to costly citations and some potentially extreme liability.

In light of several recent fire hydrant failures, and the subsequent devastation of apartment properties, authorities are now cracking down on communities that are not in compliance.

Triton Industries, Inc. is the industry leader in fire hydrant testing, maintenance and repairs. Please contact our offices if you wish to schedule an evaluation of your property.

If you have any questions regarding this information, or would like a copy of N.F.P.A. CODE 25: (Section 4-3.2 through Section 4-5), please contact Triton Industries, Inc. at (770) 918-8999. The enclosed information may be verified through the State Fire Marshal's Office.
